FROGIZ FREE AND FROGIZ PREMIUM FOR IPHONE

Puzzle games Frogiz FREE and Frogiz Premium are now released and available on the AppStore.

iPhSoft announces that the two puzzle games: "Frogiz FREE" and "Frogiz Premium" are released and available on Apple's AppStore. Frogiz was born for the iPhone. It was born with a deep passion and love to the small touch screen platforms that opened a new exciting domain for game developers. It was invented by Haim Shafir, one of the most prolific board games inventors with a few legendary best sellers such as Halli Galli and Taki. Like most of Shafir's ideas, Frogiz is simple yet intriguing and provides countless hours of fun and excitement.

So what's the idea of Frogiz? Your objective is to clear the pond from frogs and leaves. There are two types of leaves – round and rectangular and two kinds of frogs – green and pink. Touching two identical objects which are aligned vertically or horizontally and have no other object between them will make them both disappear. Frogs can jump over to leaves and leaves can be moved under frogs but no object can be moved into an empty space. Move the leaves and the frogs to make pairs that can be eliminated, clear the pond and jump to the next puzzle. The game comes with more than 100 puzzles but you can use the 'Frogiz Puzzles Designer' to create your own puzzles and challenge your friends and family.
